# A script typeface inspired by American lettering style.

Vicomte FY is a script typeface inspired by the American lettering style known as Engrosser's script, Engraver's script, or more commonly, Copperplate. Designed as "engraving on paper", Engrosser's script letters were carefully and slowly built-up in several strokes with a pointed pen, an attempt to imitate more the burin of the engraver than the quill of the writing master.

Motivated by the same goals, Vicomte FY looks away from handwriting and shows inscribed qualities in its letters. The alternation of curves and angles, along with the narrowness of the characters and the tight spacing give Vicomte a dark and catchy texture, producing words with strength - without losing the delicacy of formal scripts.

The image shows the lowercase letters 'a' and 'b' in a highly decorative, cursive script. The 'a' has a large, elegant loop, and the 'b' has a tall, thin stem with a curved top.

Script typeface

The image shows a single uppercase letter 'E' in a cursive script. It features a very sharp, pointed top and a decorative, swirling tail that loops back towards the center.

Sharp design

The image shows the lowercase letters 'g', 'r', and 'u' in a cursive script. The letters are connected, and the junctions between them are notably low and sharp, giving the word a dynamic, slanted appearance.

Low junctions

The image shows a single uppercase letter 'U' in a cursive script. It has a large, sweeping curve on the left side and a sharp, angular point at the bottom right.

Curves & angles

The image shows the lowercase letters 'i', 's', and 'm' in a cursive script. The letters are highly stylized and elongated, with a wide range of vertical movement (amplitude) and a slanted, dynamic feel.

Amplitude

The image shows the lowercase letters 'i' and 'n' in a cursive script. The 'i' has a decorative, curved tail, and the 'n' has a sharp, angular top and a curved bottom, representing alternate letter styles.

Alternates letters
