aa

Sturdy *Slab* serif Rooted in **Ethiopic** *traditional* writing

Kefa III is the third version of the Apple System font *Kefa*. The typeface design has been refined a little more and language support extended to match Black Foundry's standard glyph set with Vietnamese support, more currencies, fractions and arrows, and case-sensitive punctuation.

Kefa III design is elegant and modern with slab-serif origin, sharp and curved. Its large x-height

and relatively condensed letterforms makes it both highly legible and space-saving for dense text and immersive reading. A particular attention to details and curve shaping makes it an attractive option for setting display text and headlines too.

The original design was mixing both Latin calligraphic tradition and Ethiopic heritage in a single design: it has been a cross-country typeface since

the beginning of its conception, and still is. It is also tuned for screens, and its sturdiness makes it a relevant choice for User Interface as well.

It now comes in 4 weights only, for more simplicity, plus matching italics. The new Variable Font format for both Romans and Italics enables users to precisely define the weight they need.

Black Foundry

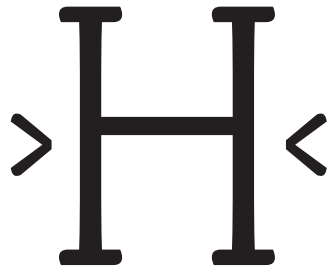

Slab serif, curved & pointed

Big x-height for better readability

Modern shapes

Slightly condensed

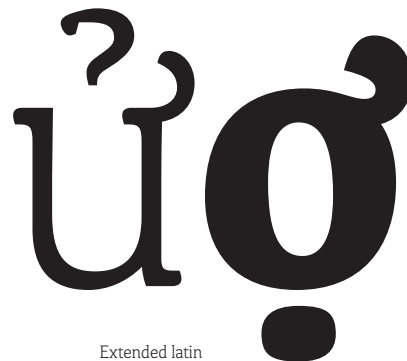

Curve breaks design details

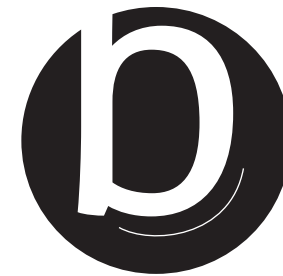

Numerous ligatures and infinite and automatic f- ligatures

Organic shapes

Extended latin

The table shows Ethiopian cities with more than 40,000 inhabitants. The population numbers are referring to the inhabitants of the cities themselves, the metropolitan area outside the city area are not taken into account. Given the suburbs and the metropolitan area, the number of inhabitants might be much larger in several cases.
